PROFESSIONAL SUMMARY

Results-driven Mobile App and MERN Stack Developer with nearly 4 years of experience building scalable web and mobile applications, with 10 apps shipped live on Google Play and the App Store. Proficient in React Native, React.js, Node.js, and modern JavaScript technologies. Skilled in developing end-to-end solutions — from real-time chat and video calling apps to OTT streaming platforms and ERP systems. Passionate about creating intuitive user experiences and delivering high-quality, production-ready software.

PROFESSIONAL EXPERIENCE

Brythm Private Limited — *Oct 2026 – Present*

Full Stack Developer

- Developing Tiffexx, Brythm's home-cooked tiffin delivery platform, live on Google Play
- Tiffexx runs as three React Native apps: customers, tiffin partners (home kitchens) and delivery partners
- Features include one-time and subscription ordering for lunch & dinner, live order tracking and secure payments

G. S. Tele Communication Limited — Gurgaon, *Dec 2025 – Sep 2026*

App Developer

- Built the Baofeng Radios e-commerce app, live on Google Play and the App Store
- Building customer-facing and internal features using React Native and Expo
- Collaborating with the team to design, implement, and optimize app functionality and UI/UX

ATRN Solution LLP (AETURN) — Noida, *Aug 2024 – Dec 2025*

Software Development Engineer

- Developed tech-enabled healthcare solutions integrating AI/ML with modern mobile and web technologies
- Built and maintained full-stack features across React Native (mobile) and React.js/Node.js (web) platforms
- Implemented real-time features using WebSockets and Socket.io for live data and notifications
- Collaborated with cross-functional teams to deliver precision-driven healthcare software products

Abaris Softech Pvt. Ltd. — Delhi, *Mar 2024 – Jul 2024*

App Developer

- Developed and shipped mobile applications for clients using React Native and Expo
- Integrated third-party APIs, payment gateways, and FCM push notifications
- Contributed to an ISO 9001:2015 certified team delivering eCommerce and service-based apps

MakSoft Pvt. Ltd. — Rewa, *Dec 2022 – Feb 2024*

MERN Stack Developer

- Built full-stack web applications using MongoDB, Express.js, React.js, and Node.js
- Developed RESTful APIs and integrated third-party services for digital marketing platforms
- Implemented SEO-optimized frontend interfaces to improve client digital visibility and engagement

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Python

Backend: Node.js, Express.js

Database: MongoDB, Redis Cache, Node Cache

Cloud & Storage: AWS S3, AWS EC2, Cloudinary

Real-time & Comms: WebSockets, Socket.io, WebRTC (Video/Audio), FCM (Push Notifications), Axios

State Management: Redux, Context API

Version Control: Git, GitHub

KEY PROJECTS

01. Tiffexx | *3 Apps, 2026*

Tech: *React Native, Expo, Node.js, MongoDB, FCM, Payment Gateway*

A home-cooked tiffin delivery platform connecting customers with local home kitchens. Customers order lunch and dinner tiffins one-time or on subscription and track delivery live, while separate partner apps let kitchens manage orders and delivery partners handle drop-offs. Live on Google Play.

02. Baofeng Radios App | *App, 2026*

Tech: *React Native, Expo, EAS Build, Firebase, RTK Query*

An e-commerce mobile app for Baofeng radio equipment, featuring dynamic product filtering by category, brand, and attributes, an integrated HDFC payment gateway with secure callback handling, and a smart QR-based redirect system that routes users to the correct app store based on device OS. Built with production-grade EAS Build configuration to resolve complex iOS CocoaPods/Firebase compatibility issues.

03. Edumug Teacher App | *App, May 2025*

Tech: *React Native, Node.js, MongoDB, Express.js, Redux*

A dedicated teacher companion module within the Edumug school ERP platform, enabling teachers to manage attendance, grades, timetables, and parent communication from a single mobile interface. Streamlines daily classroom administration and reduces manual reporting overhead for school staff.

04. Theater Crave | *App + Web, Aug 2023*

Tech: *React Native, Node.js, MongoDB, Payment Gateway, FCM*

A movie theater companion app that lets users order food and beverages directly from their seats and have it delivered in-theater. Features real-time order tracking, seamless payment integration, and a web-based admin panel for theater staff — delivering a hassle-free dining experience without missing a moment of the film.

05. FlipChat | *App, Jun 2024*

Tech: *React Native, WebRTC, Socket.io, Node.js, MongoDB, End-to-End Encryption*

A feature-rich real-time messaging application supporting text messaging, voice & video calls, media sharing, and group chats. Built with WebRTC for peer-to-peer video/audio communication and Socket.io for live messaging. Offers end-to-end encryption ensuring complete user privacy and security.

06. Hisaab Pro | *App, 2026*

Tech: *React Native, Expo, Node.js, MongoDB*

A personal finance and expense-splitting app built for India, offering UPI-first expense tracking across 16 categories, group bill-splitting with real-time settle-up, and a freelancer dashboard for tracking client payments, team pay, and net profit. Includes smart spending reports and income-vs-expense analytics.
